

MinkMApp

Setup instructions – for Group Admins

MinkMApp is available to any Mink Group or related individual. If you wish to use it within a group context, all users of the app will have to login with the same email address and password. This enables everyone using the app to view the group's records but keeps your records private to your group only.

The group administrator should decide on the email address and password to use and will then need to create that account on Coreo using the following instructions.

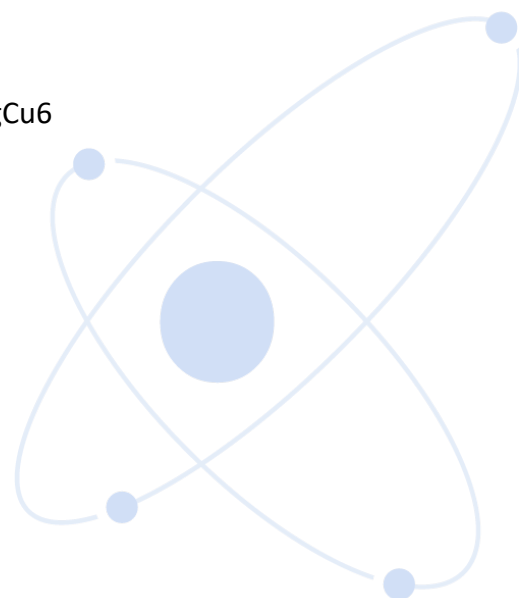

Instructions explaining how your group members should access the app are in a separate document.

Step 1. If you have the Coreo app installed already **delete it**.

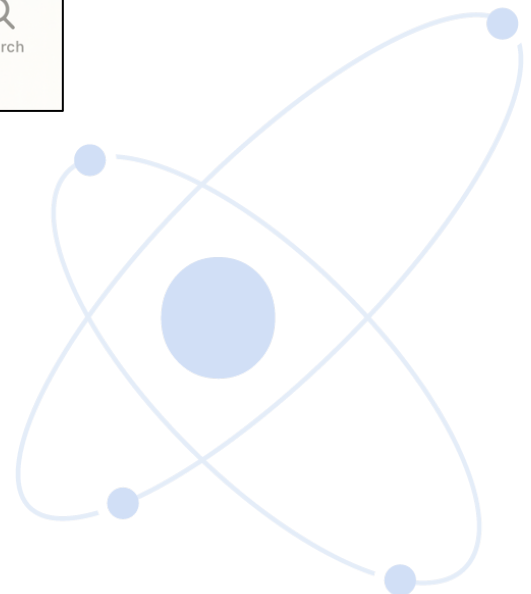

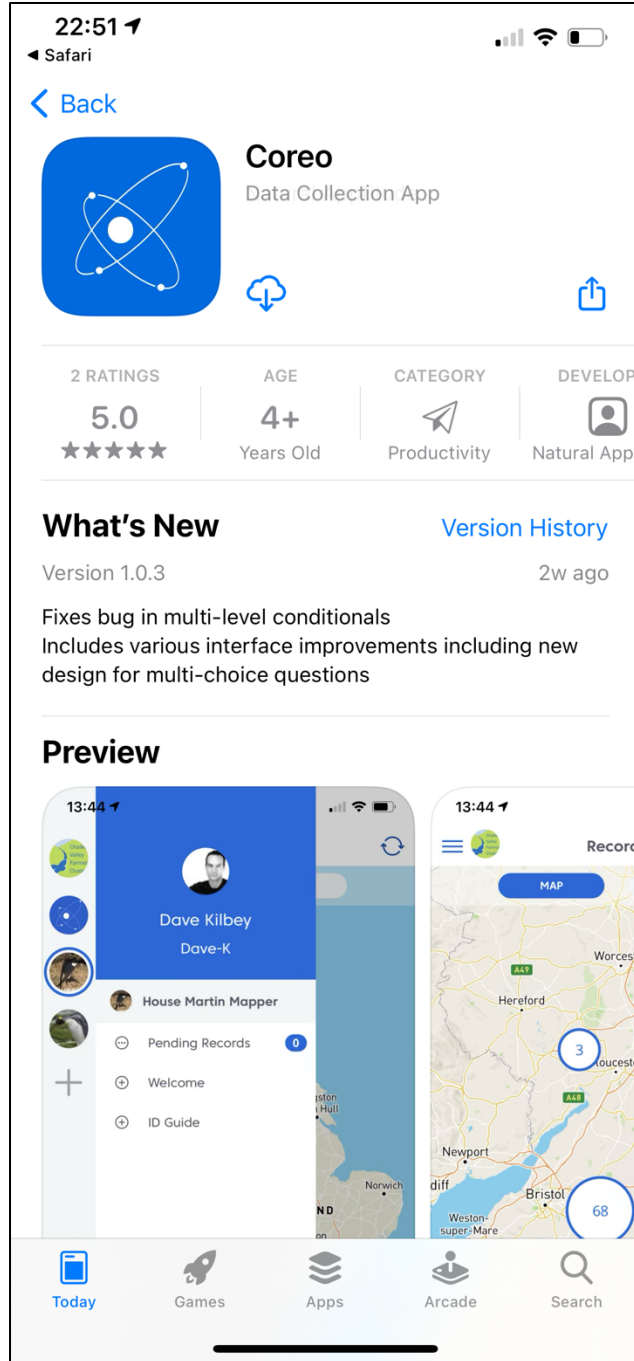

Step 2. **From your phone** click on the following QR code or use the URL below:

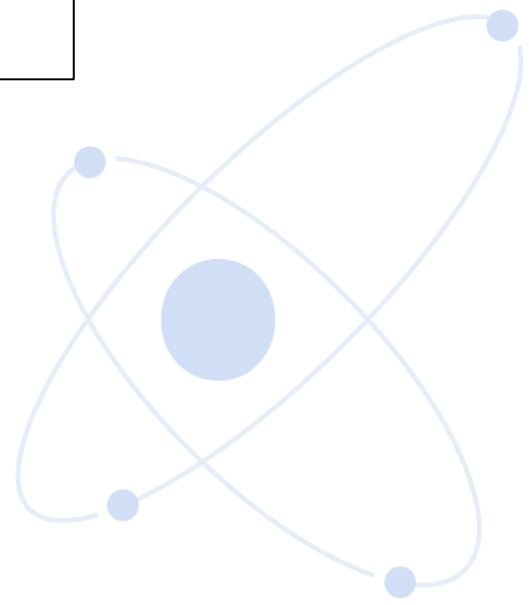

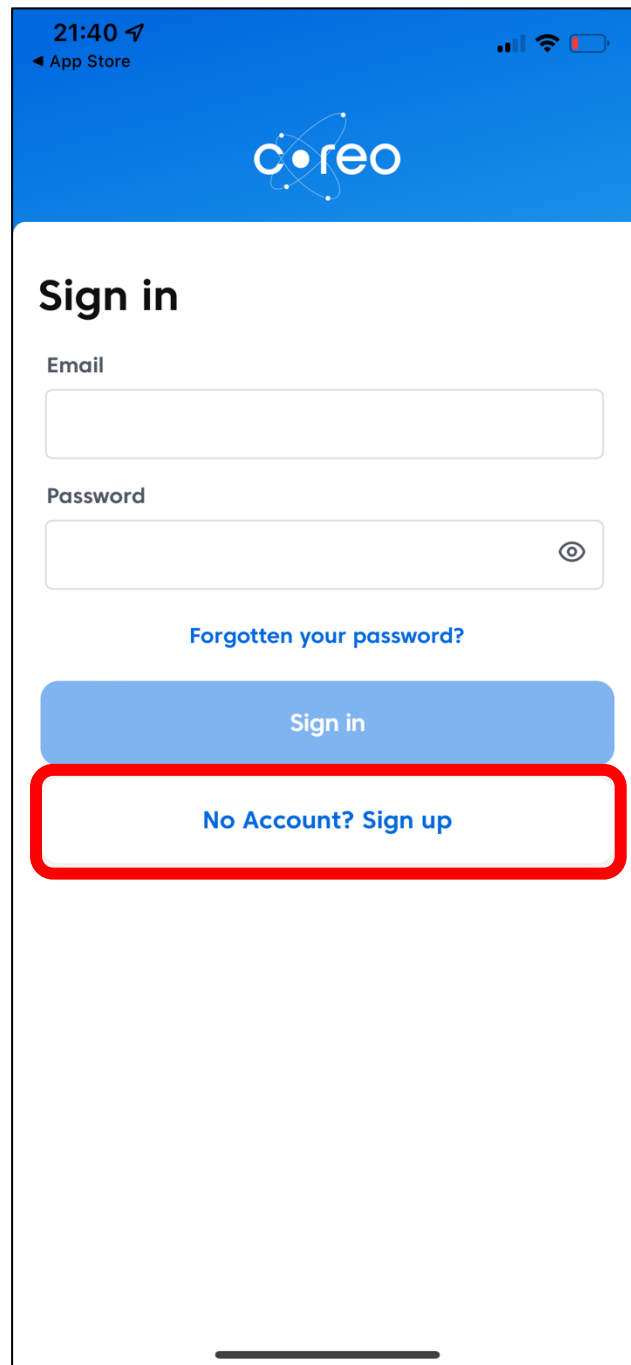

<https://coreo.page.link/gy3rRZYDhSLsygCu6>

Step 1. Install the Coreo app

Step 2. Select the **No Account? Sign up** button

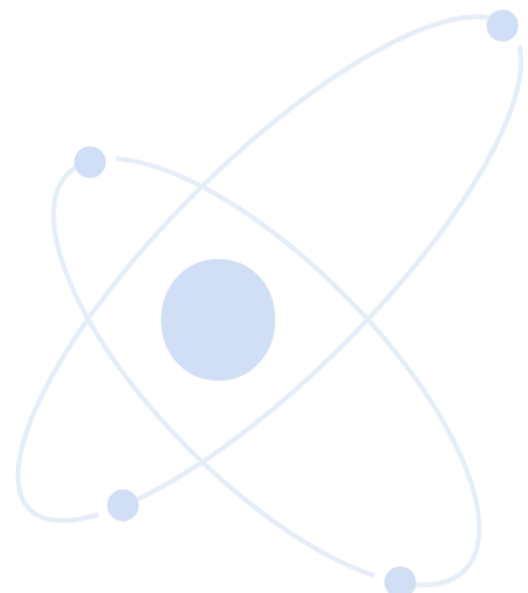

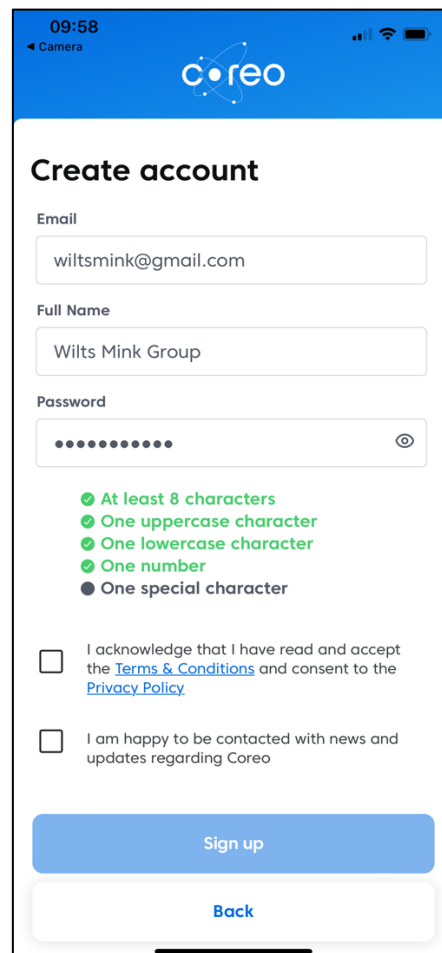

Step 3. Create your account

Fill out the required account information:

- **Email** - Enter the email address you will share with the group's members (Coreo will send a verification link to the email you specify so it must be both genuine and accessible)
- **Full name** - Enter the group's name here.
- **Password** – Coreo requires a certain number and combination of characters to ensure your password is secure. Remember you are sharing this with others so keep it relatively simple.
- **Check boxes** - Tick to acknowledge the T&Cs (required) and whether you'd like to receive updates (optional)

Then hit **“Sign up”**:

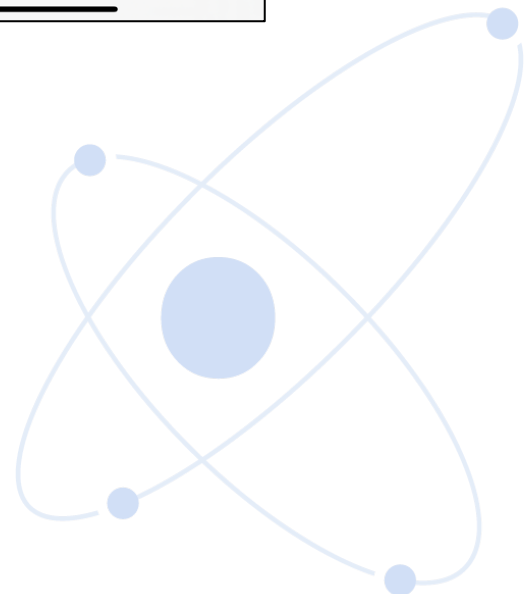

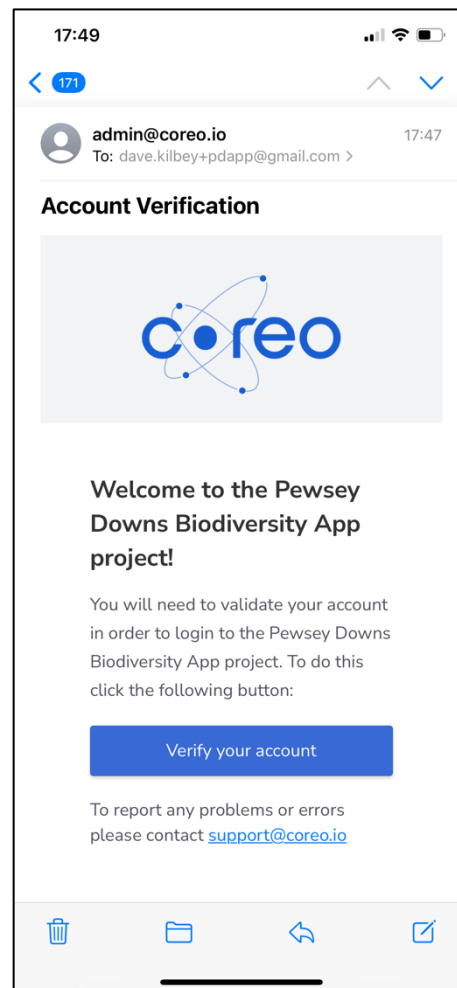

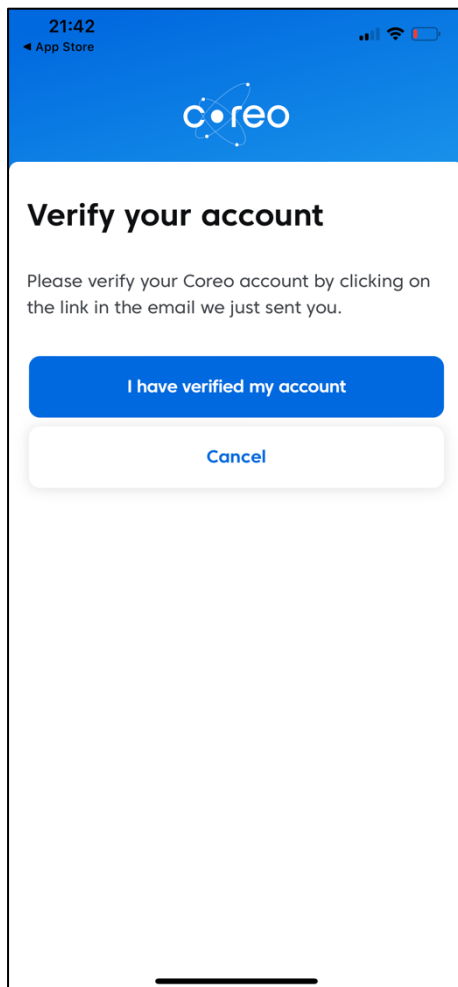

Step 4. Verify your account

You'll now see the **Verify your account** page. Before clicking the "I have verified my account" button (screenshot on the left), find the verification email sent to you by Coreo (check your spam folder if it's not in your main inbox).

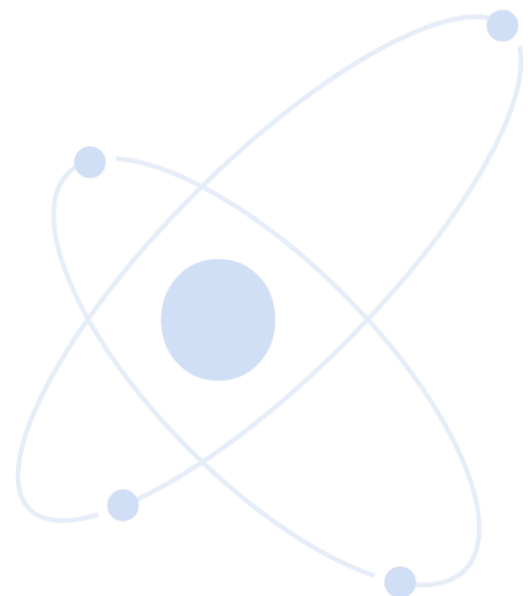

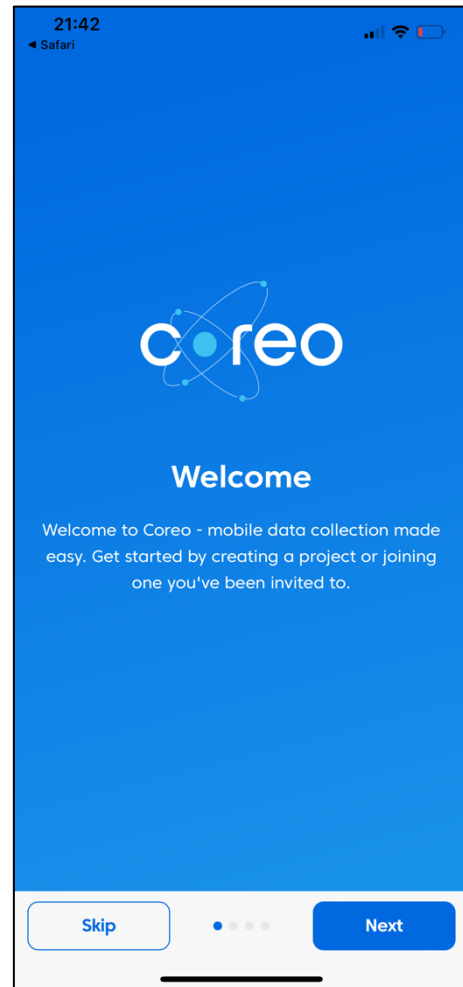

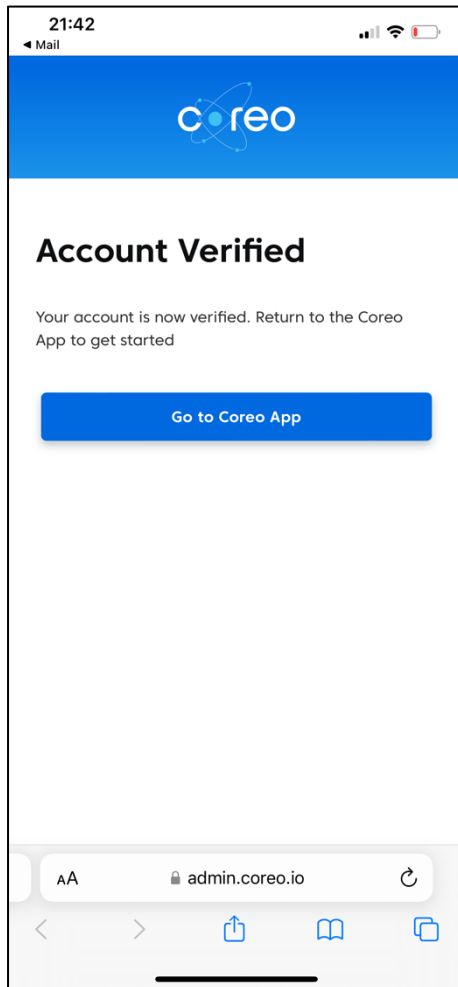

Step 5. Click the **Verify your account** button (screenshot on right).

Step 6. Switch back to your browser to the **Verify your account** page and confirm you have verified your account.

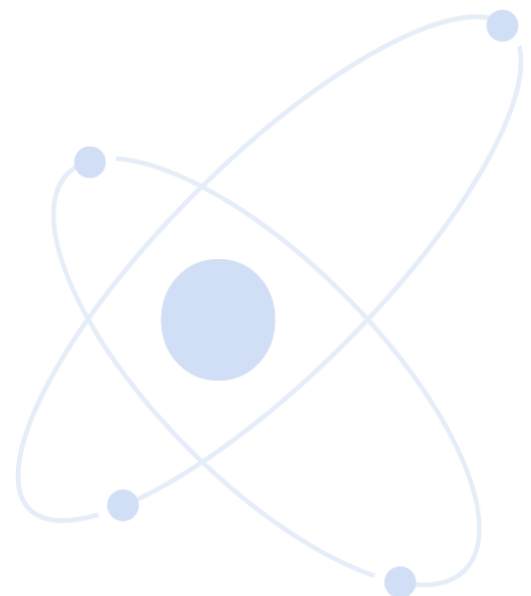

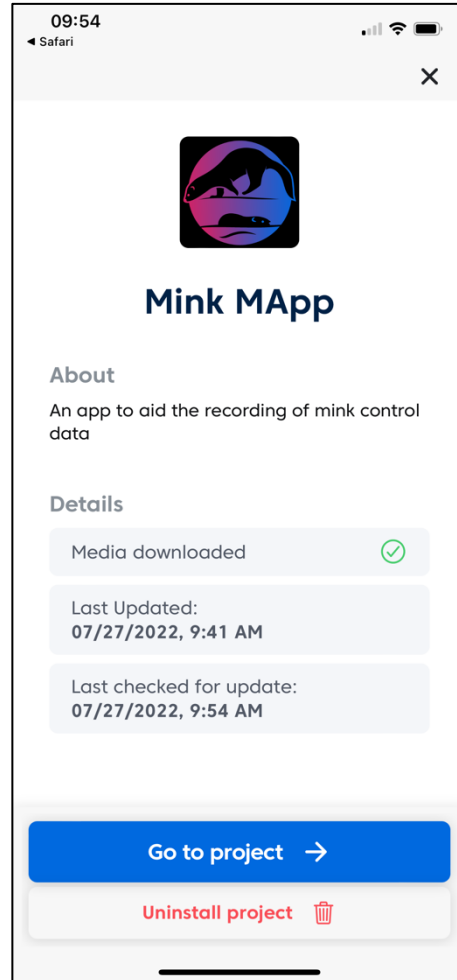

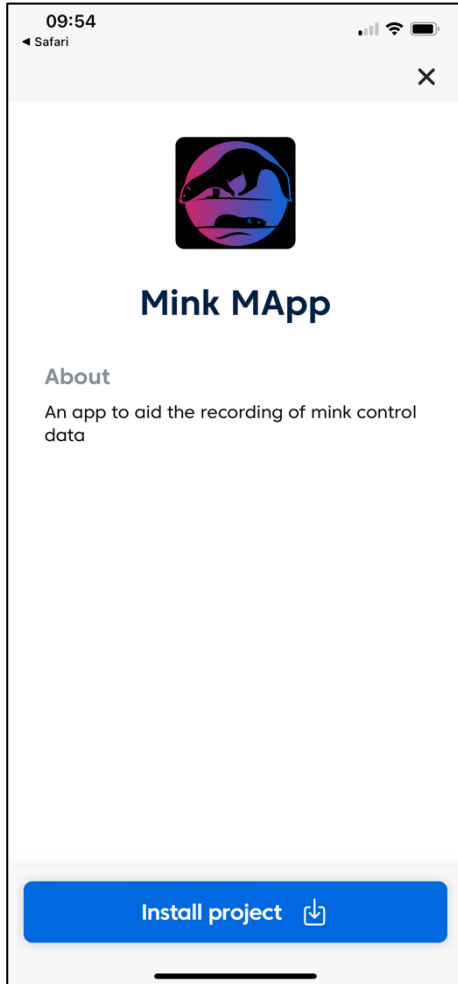

Step 7. Go to Coreo app

- You'll now see a confirmation page. Click the **"Go to Coreo App"** button.
- Follow through (or Skip) the tutorial

Step 8. Install the MinkMApp project and then select 'Go to project'

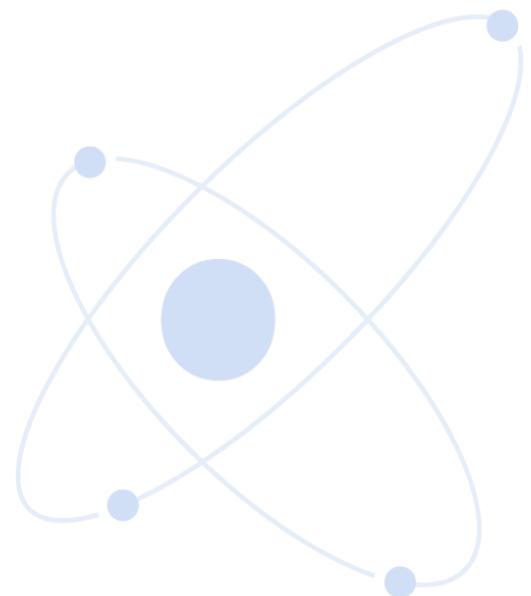

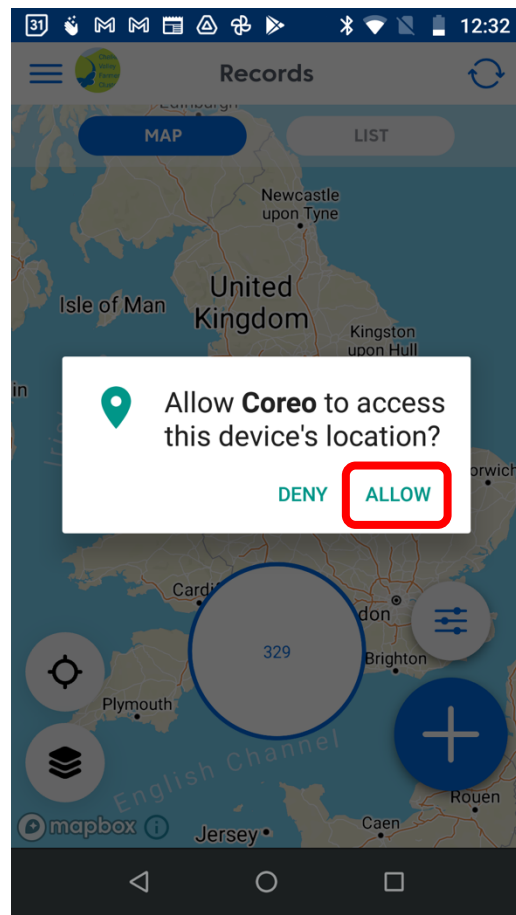

Important!!

Step 9. Give Coreo permission to use your location

iOS: Choose **Allow While Using App**

Android: Choose **Allow**

Step 10. And that's it.

You're now ready to:

- share the app login details with others
- use the app and start adding records.

Simply click on the **+** button to add your first record.
